

Why choose THE CIP LINER?

Cured-in-Place Vertical Liner for Wastewater Rehabilitation

- Permanently eliminates I&I
- Impervious to H₂ S sewer gas
- Monolithic bond to host structure
- No need for bypass pumping
- No digging or surface destruction
- Custom designed for each structure
- “Green Technology” solution
- Lowest cost for the life of the structure
- 20-year, non-prorated manufacturer’s warranty
- Reduces treatment plant costs
